Mr. B.O. Colton, Jr.,  
Roosevelt, Utah

RE : LAKE FORK DIST.

Dear Sir:

It might be of interest for you to know that Mr. Irvin Snow and Mr. J.W. Blazzard, both of the Farnsworth Canal Company, visited this office on the 11 inst. seeking information about the Equalization Plan being considered by the Lake Fork Water Users in Uintah Basin.

They said that with this plan as outlined to them by the Committee, the Farnsworth Canal Company had been given no credit for some 2500 ac. ft. storage capacity owned by it on Lake Fork System. They further represented that their reservoirs were built and paid for but they did not fill every year. The Committee therefore, did not see fit to recognize them. They stated that their stockholders felt they should have credit for the reservoirs before they would vote to participate in Equalization; voting was to be done next week and unless they could convince themselves or their people the Committee was right or in error, the Farnsworth people could not be gotten together.

Messrs. Snow and Blazzard were advised to get in touch with the Committee again and see what the plan now proposed is and discuss it in greater detail.

This information is being passed on to you since it might be of some help in the matter of Equalization.

Yours very truly,

T.H. Humpherys,

STATE ENGINEER
